

A Model for the Management of a Family Planning System: 613 72 (Classic Reprint)

By Glen L Urban

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from A Model for the Management of a Family Planning System: 613 72 This paper describes a planning model designed to be used by managers of family planning systems to improve understanding, forecasting, and planning. The macro-flow model describes the patient movement through post partum and non-post partum programs. The flows model the phenomena of: outreach recruitment, continuance, post partum checkups, switching methods, referral, migration, contraceptive use experience, private protection, method effectiveness, advertising response, follow up, abortion, and medical services. Strategic variables can be linked to the flow parameters to produce capacity requirements and budgetary implications. The model output includes benefit measures of total active patients, couple years of protection, births protected, and unwanted births prevented. The fertility aspects of births prevented are modeled through a non-stationary Markov process submodel which considers demographic phenomena without burdening the basic flow structure. The input procedures used to process patient visit, outreach, clinic survey, and experimental data are discussed and some empirical results are reported. The combination of data based estimates and subjective judgment is done by fitting the...
