

Crs Report for Congress: Renewable Energy: Tax Credit, Budget, and Electricity Production Issues: March 14, 2002 - Ib10041

By Fred Sissine

Bibliogov, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.Energy security, a major driver of federal renewable energy programs in the past, came back into play as oil and gas prices rose late in the year 2000. Also, the electricity shortages in California have brought a new emphasis to the role that renewable energy may play in electricity supply. In the 107th Congress, debate over renewable energy programs appears to be taking a focus on tax credits, incentives, and the Bush Administration's National Energy Policy report, Reliable, Affordable, and Environmentally Sound Energy for America's Future. Also, worldwide emphasis on environmental problems of air and water pollution and global climate change, and the related development of clean energy technologies in western Europe and Japan may remain important influences on renewable energy policymaking. Concern about technology competitiveness may also remain a factor in debate. For DOE's FY2003 Renewable Energy Program, the Administration seeks \$407.7 million, a \$21.3 million (6%) increase relative to the FY2002 appropriation. The main increases are \$15.5 million for Superconductivity, \$10.7 million for Hydrogen, \$7.3 for Solar Buildings, \$5.5 million for Renewable...
