Excerpt from Elementary Chemistry During the past thirty years the position of chemistry as an essential element in higher education has steadily improved. Once it was an occasional study, given in short courses, by text-books and recitations, with experiments performed by the teacher; a method almost absolutely barren of disciplinary value. It was an exercise for the memory, and being unapplied to any definite purpose it was commonly soon forgotten. Now every good high school, preparatory school, and college assigns ample time to chemistry, and laboratory teaching has become well-nigh universal. The latter, indeed, represents a modern development in education, something in which the older systems were lacking; and now the student is taught to observe accurately, to draw correct conclusions from what he sees, and to test experimentally the truth of statements which were formerly accepted without question. The study of chemistry, then, apart from its scientific and detailed applications, is a training in the interpretation of evidence, and herein lies its chief merit as an instrument of education. In the present volume this idea is...
