This introductory text is written specifically for consumers of research anyone who uses the results and implications of research studies to enhance their knowledge and improve their practice. The focus is on guiding students toward a basic understanding of the research process, allowing them to develop the skills, knowledge and strategies needed to read, interpret, and evaluate the quality of research reports. The text provides balanced coverage of quantitative, qualitative, and combined research approaches. From reviews of the book: The structure of the book is great. The authors use language that helps the reader become engaged and invites them to start applying what they have learned to their situation immediately. The examples of the journal articles with the notations are very helpful and we use these for discussion in the class quite a bit. I also like the reviewing what we've learned and practicing your skills at the end of the chapter. I much prefer the consumer approach of this text over others on the market. -- Candyce Reynolds, Portland State University...
