There are two ways in which the Manual may be used. First: To test the learner s knowledge in the usual way by means of an examination. For this purpose the class will come to the recitation-room provided with the Manual and blank books, and the teacher will simply designate by number the paper to be worked. Secondly: To exercise the learner from day to day in the various rules and processes, to detect his weak points, and ascertain where he most needs assistance. This may be done by assigning exercises to be worked in the class-room, or by assigning to each member of the class a paper with directions to hand in the solutions, neatly worked out, at a subsequent recitation. The Manual will be found especially useful in reviewing the subject of Algebra, and in preparing for examinations. Answers to the problems in the first one hundred and fifty papers, bound separately in paper covers, can be had by teachers only, on application to the publishers. G. A. WENTWORTH. G. A. HILL 5.
