

Biochemical Bulletin Volume 4, Nos. 13-15

Filesize: 8.62 MB

Reviews

These types of book is the greatest ebook readily available. I was able to comprehend every little thing using this published e pdf. I realized this pdf from my dad and i encouraged this publication to discover.

(Dr. Porter Mitchell)

BIOCHEMICAL BULLETIN VOLUME 4, NOS. 13-15

To download **Biochemical Bulletin Volume 4, Nos. 13-15** eBook, remember to follow the web link below and download the file or gain access to other information which are have conjunction with BIOCHEMICAL BULLETIN VOLUME 4, NOS. 13-15 ebook.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1915 Excerpt: .to the presence of the glyceryl radical, glycerol itself causing reduction. Phenol reduced even in cold acetic or sulfuric acid mixture of ammonium molybdate. Uric acid gave positive results. The reactivity of ammonium molybdate in this respect is too general to be of value as a differential test. The study is in progress. 173. Autolysis and nuclear relations. Max Morse. (Dep t of Physiol., Univ. of Wis., Madison.) There is a more or less direct relation between the character of an organ with respect to its nuclear content, from the histological standpoint, and its rate of autolysis, whereby those organs in which there are relatively greater masses of nuclei to that of matrices (cytoplasm, interstitial substance, protoplasmic differentiation in the form of fibres, etc.), such as glands, show greater rates of Salkowskian autolysis. Accordingly, the hypothesis might be formulated that some connection exists between the distinctive chemical component, nucleic acid, and the rate of tissue-enzyme action. This hypothesis was tested by 27 Miller and Taylor: Jour. Biol. Chetn., 1914, xvii, p. 531. adding given amounts of liver, spleen and thymus nucleic acid²⁸ to pig liver brei, and following the rate of autolysis by estimations of total nitrogen on tannic acid nltrates. As the accompanying table shows, there was no apparent modification of rate of enzyme action. Doubtless the relation between nuclear component and rate of autolysis concerns the activity of organs which are relatively richer in nuclei, such organs being in a more active state, metabolically....
